A close-up photograph of a white, cylindrical, handheld facial massager. The device has a silver-colored band around its middle and a silver-colored nozzle at the bottom. The nozzle has a triangular face with five small, white, spherical massage heads arranged in a cross pattern. Below the heads is a small, downward-pointing arrow. The brand name 'KELLEY QUAN' is printed in a stylized, pinkish-red font on the upper part of the device, with 'pocket spa' in a smaller, black, sans-serif font below it. In the background, a silver-colored bottle with a red label featuring a large white 'K' and 'Q' is visible, slightly out of focus. The entire scene is set against a blurred background of red and white fabric, with the products resting on a light-colored wooden surface.

Introducing the Pocket Spa®

A Revolutionary New Device that Instantly Hydrates and Moisturizes Dry, Parched Skin.
Softening the Signs of Aging and Leaving Skin Dewy, and Fresh.

A new and unique form of facial skincare made possible by nano technology. The Pocket Spa turns plain water into a miracle-mist® of tiny water droplets that are small enough to penetrate the skin to hydrate and moisturize without the aid of oil or chemicals.

Under optimum conditions the skins outer layers are around 15% water, at this level the skin is supple, flexible and cell regeneration is harmonious within the epidermis layer of the skin. However water is all too easily depleted by natural and environmental factors such as soaps, detergents, dry air, heating systems, air-conditioning, air travel and UV from the sun. There are also air pollutants, dust, pollen and an untold number of other hazards relentlessly assailing us, and of course our face is on the front line of these attacks.

As the skin dries, it tightens and the body starts to shed cells faster than new ones are created, this results in dead cells forming into a flaky, rough layer of skin. The classic signs of premature aging.

How The Pocket Spa® Can Help?

With the help of science and technology The Pocket Spa combats dry skin in a totally new and innovative way. Using nano technology this little device is able to transform plain water into a miracle-mist™ of tiny water droplets that are small and delicate enough to penetrate deeply and offer instant relief to dry, tight skin.

Over-moisturizing with oil-based creams can upset the skin's natural balance but hydrating with water has no side-effects, other than gorgeous skin!

The Pocket Spa's water droplets are smaller than those of condensing steam used in spa treatments and smaller than those from aerosol and they will never leave skin wet, just glowing and hydrated. The Pocket Spa's droplets are so small they can penetrate through makeup, hydrating the skin and keeping makeup looking fresh throughout the day, evening and into the night.

About Kelley Quan

Kelley Quan New York LLC was founded in 2012 by internationally renowned makeup artist and skin care expert Kelley Quan. Using her knowledge and expertise Kelley first developed a collection professional grade, cruelty free, vegan makeup brushes which are endorsed by PETA.

Kelley Quan, who has been a professional makeup artist for 25 years developed the Pocket Spa in answer to the one question that she has been asked most often. "How do I get and keep beautiful youthful looking skin?" Her answer is always "Stay hydrated!" And with the Pocket Spa she has developed a new and better way to keep skin hydrated..

In the background, a white ceramic bathtub is visible, featuring a chrome faucet and a chrome towel rack holding a white towel. The scene is set in a bright, modern bathroom with a window showing greenery outside.

THE POCKET SPA By Kelley Quan, Available at kelleyquan.com

The Pocket Spa: Retail Price \$85.00

A revolutionary new device device that hydrates and moisturizes skin without heavy oils, silicones or chemicals - just pure natural water.

The Pocket Spa is a compact, refillable and rechargeable personal humidifier that uses nano-technology to turn plain water into a moisturizing-mist of tiny water droplets that are small enough to penetrate the epidermis and replace moisture that is constantly being leached from skin by natural and environmental factors such as soaps, detergents, dry air, heating systems, air-conditioning, air travel and UV from the sun.

The Pocket Spa will help create a healthy, even complexion that looks youthful and dewy-fresh.

The Pocket Spa's miracle-mist™ revolutionizes your beauty regime by hydrating and moisturizing your skin, increasing the efficacy other skin care products and keeping your makeup looking fresh for longer.

Hydrate & Moisturize

The micro-mist of tiny water droplets are so small they go places no other water products can. Smaller than condensing steam and aerosols the Pocket Spa penetrates deep and hydrates without the aid of oil or chemicals.

Plays Well with Others

The Pockets Spa's unique and natural penetrative hydration improves the effectiveness of other skin care products by infusing moisture into the skin and creating the optimum environment for products like tonics, serums and moisturizers to produce deeper, longer-lasting results.

Keeps Makeup Looking Fresh Longer

The Pocket Spa's tiny water droplets are small enough to penetrate through makeup, allowing you to moisturize even after you've applied makeup. Which keeps your skin healthy and your makeup looking fresh all day long.

Features & Benefits

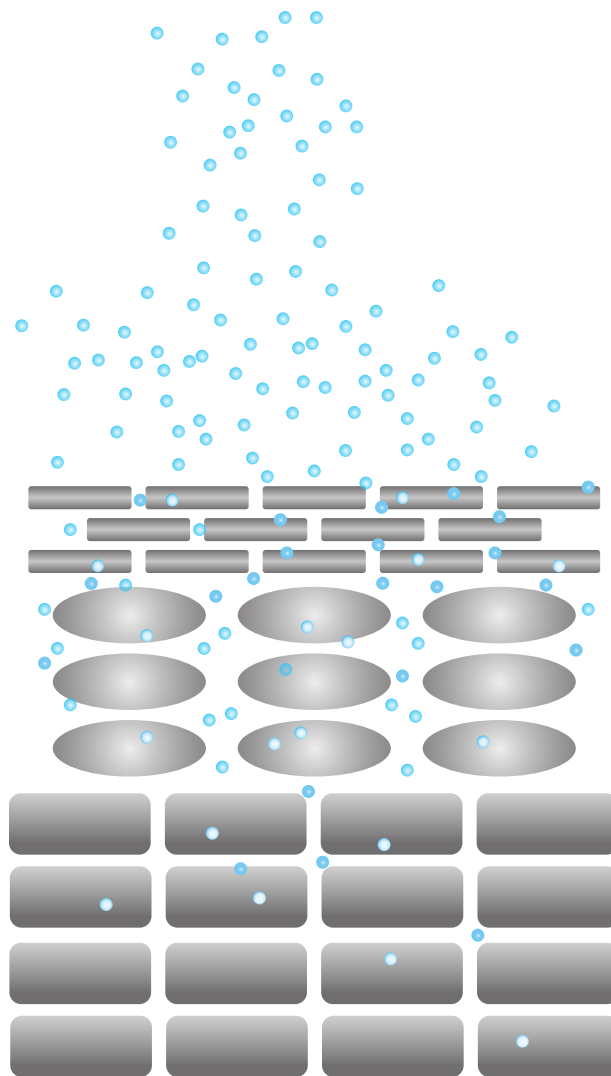

- * Tiny 8µm (microns) water droplets penetrate deep in to the skin
- * Micro-mist instantly hydrates to soothe and rejuvenate dry, parched, tired and blemished skin
- * Creates a dewy look: Moisture without wetness for a healthy, vibrant looking complexion
- * The convenience of a home spa experience, anytime, anywhere
- * Great for all skin-types
- * Refillable: Wide mouth water tank makes refilling easy
- * Use pre and post cleansing and after all skincare and makeup application
- * Relieves dry skin after sun exposure
- * Natural hydration for skin during air travel and in extremely dry or controlled climates
- * Softens skin and reduces the appearance of fine lines and wrinkles
- * Rechargeable lithium battery via USB.

Water Droplets From Condensing Steam

Illustration not to scale

Water Droplets From The Pocket Spa

The Pockets Spa's moisturizing mist of tiny water droplets is able to penetrate and hydrate skin without that aid of oil or chemicals.

The Pocket Spa's Water droplets are 8 μ m (microns) in diameter, smaller than condensing steam, aerosols and pump action spritzers.

Relative Size of Water Droplets
 Pocket Spa – 8 μ m (microns)
 Condensing Hot Steam – 100 μ m
 Drizzle – 300 μ m
 Normal Rain – 1mm

AMAZING new beauty "secret"

I am sharing with you an AMAZING new beauty "secret" that has quickly become a daily staple in my skincare arsenal. As a makeup artist, I love makeup. However as any good makeup artist will tell you, the foundation for a beautifully created makeup look, starts with great skin. I am obsessive about my skincare routine, and wish that more people took time to pamper their skin the way it should be treated... *Liza Nicole Chung, Makeup Matters*

I simply flipped out

Kelley used this atomiser spray on my face that I simply flipped out over and had never seen anything like it before. You see, I love Rosewater spray and I'm a huge fan of hydrating my skin – I use it everyday as a part of my daily routine. I asked Kelley where I could get it from and she told me she invented it and came up with the concept. Genius! *Ljubenka Hold The Glamour*
